

Screen Repair Form

This is a **web-based form** for generating detailed repair orders for window and door screens. It is designed for in-store employee use to quickly calculate costs, generate totals, and print/share a formatted order summary for customers.

Features

Customer & Store Input

- Auto-filled **date** field
- Customer **name** & **phone number** (phone auto-formats as (XXX) XXX-XXX)
- **Store ID** field with auto-complete suggestions:
 - Normalized to uppercase with hyphens (IL-EDGEBROOK)
 - Suggestions are remembered per browser using `localStorage`

Tax Management

- **Custom tax rate per store** (input as percentage)
- Save button stores the tax rate to the Store ID in the browser
- Automatically restores the **last used store** and its tax rate on page load
- Also supports URL parameter to preselect a store:
 - `<URL>?store=IL-EDGEBROOK`

Screen Entry System

- Add multiple screen with:
 - Width & height (in inches)
 - Quantity
 - Material (e.g. Silver Fiber, Aluminum, Pet Screen, etc.)
 - Optional **corners** (\$7 each)
- Prices Automatically calculated
 - Uses nearest preset size for material pricing
 - Glass/Plexiglass costs scale with dimension

- Dynamic totals update live

Summary Pannel

- Displays:
 - Total Screens
 - Screen Total
 - Labor Charges
 - Tax (store-specific)
 - Grand Total

Printable Output

- Clicking "**Generate Form**" opens a new tab with a **formatted repair order**, including:
 - Customer Details
 - Store ID and tax rate applied
 - Itemized screen details
 - Totals and disclaimer
- Ready to print or save as a pdf

How to Use

1. Open the Form (Click the link below)
 - [Screen Repair Form](#) ↗
 - Works in any modern browser
2. Enter Customer Info
 - Date auto-fills
 - Fill in name and phone
3. Enter Store ID & Tax
 - Fill in a Store ID (e.g. IL-EDGEBROOK)
 - Enter tax-rate (e.g. 10.25)
 - Click "**Save tax for this store**"
 - On next use, the form will remember the Store ID and the tax rate associated with it
4. Add Screens
 - Input size, quantity, and material
 - Optional: add corners

- Use the "**Add another screen**" button for a screen of different material, size, etc.
- Remove with the **red x** button

5. Check Totals

- Live summary updates with costs and tax

6. Generate Form

- Click **Generate Form**
- A new tab opens with the formatted repair order
- Print or save the PDF for records

Notes

- **Data Storage:** Store IDs and tax rates are saved locally **in the browser's localStorage**, not a server
- **Compatibility:** Fully client-side; no internet required once loaded.

A Little Background on How browser localStorage is used

Not necessary for implementation in your store! Just a little background on how the program uses YOUR COMPUTER to work!
